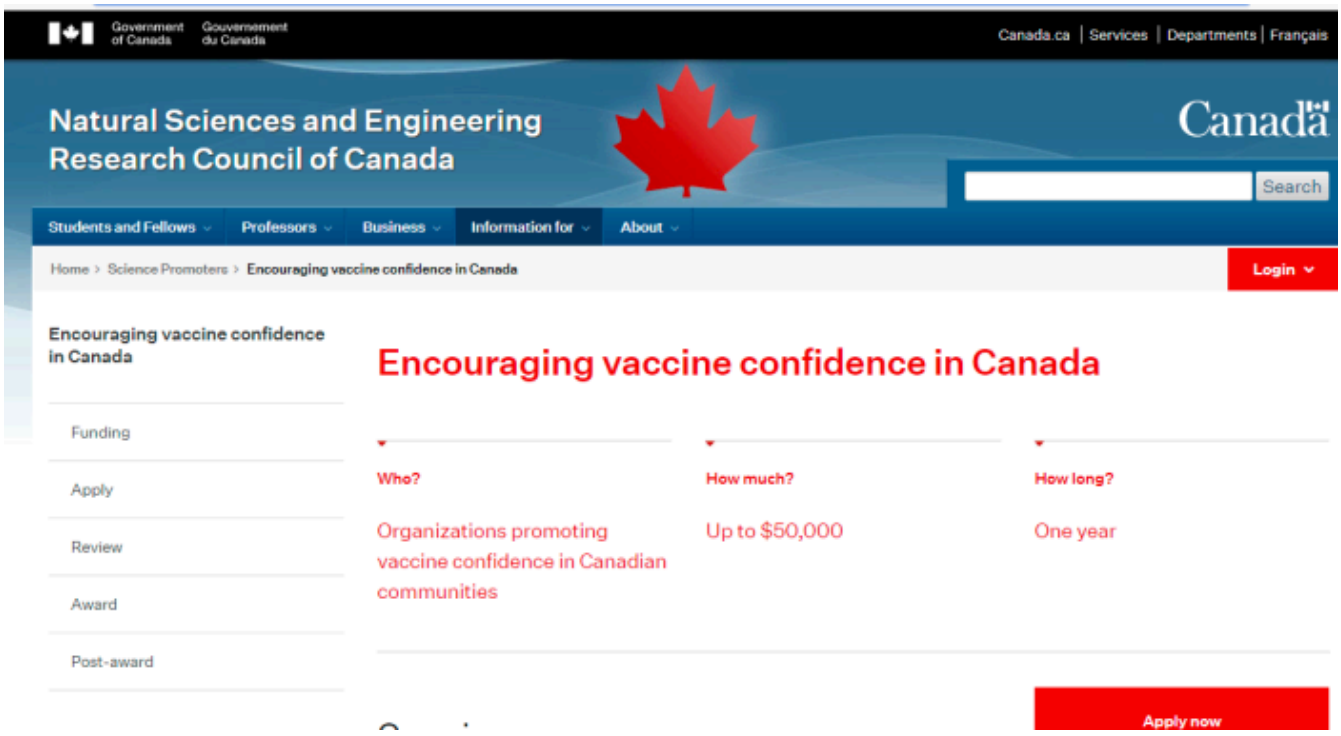
#CRSH, #CRSNG -#IRSC announce $2.25 million in funding to support awareness to increase confidence in #vaccins in Canada.
For more information: ow.ly/90W050DP5gB



On Tuesday, March 9, 2021, these 4 bodies held a joint conference to discuss funding opportunities for targeting minority groups in Canada for vaccination. This isn't limited to these CV "vaccines", but is aimed at vaccination in general. In case anyone wonders that the videos are taken out of context, the entire videos and power-points (both English and French), are included in the following links.

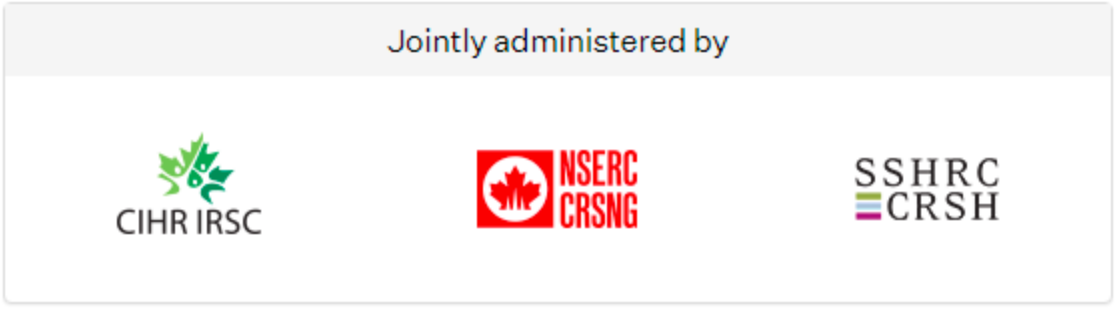
This is a continuation from this previous article. The Canadian Institutes for Health Research (CIHR), Natural Sciences and Engineering Research Council (NSERC), and Social Studies and Humanities Research Council (SSHRC), are launching this joint program. $2.25 million is to be spent. Grants are to be up to $50,000 each. In theory, 45 organizations could receive this money.

To be clear, this isn't about financing research into the causes and details of "vaccine hesitancy". Instead, this is about employing institutions (who present as scientific) to push the narrative that vaccination is a good thing. This is paying organizations to promote the push the narrative. In short, this is glorified advertising. It is made clear throughout that this is not about employing research.

If you want this money, you need to figure out how to target a minority community in Canada, getting them more accepting of mass vaccination. Having a science background is not important, provided you are good at selling things. Is your integrity worth just $50,000?



You may be forgiven for thinking that CIHR, NSERC, and SSHRC were about providing grants for scientific research. That is supposed to be their agenda. But not today.

(i) Media Outlets, Banks, Credit Unions, All Getting CEWS

Other articles are available above. They concern both the corruption of the media in Canada, and the "vaccine hesitancy" research that has been underway for a long time. Take the deep dive.

While so much of the Canadian media is compromised, this site never will be. Truth matters much more than money.

PUBLIC HEALTH ONTARIO
Adverse Events of Special Interest (AESIs) for COVID-19 Vaccines Surveillance

This document includes a list of AESI for COVID-19 vaccines that have been identified to date by international health authorities, including the Public Health Agency of Canada (PHAC), Brighton Collaboration and World Health Organization (WHO).

The AESIs that are described within this document
have been selected based on a theoretical rationale for a possible association with COVID-19 vaccines, not due to events or other findings from COVID-19 vaccine clinical trials

https://www.publichealthontario.ca/-/media/documents/ncov/vaccines/2020/12/covid-19-guidance-aesis.pdf?la=en

I find it interesting that the above post got me a two day ban on Facebook. Every word is straight from the PHO website.
Something to hide?

The vaccine wasn't created to save us from the pandemic.
The pandemic was created so we would take the vaccine.
